## Author

Jaime Gasco, MD, is a world-renowned neurosurgeon and author of several books and articles on the subject. He is the Director of the Complex Spine and Tumor Surgery Program at Barrow Neurological Institute in Phoenix, Arizona, and Clinical Professor of Neurological Surgery at the University of Arizona College of Medicine.

## Content

Essential Neurosurgery Companion is divided into five sections, covering the most common neurosurgical procedures:

- Cranial surgery
- Spinal surgery
- Endoscopic surgery
- Minimally invasive surgery
- Vascular neurosurgery

Each section provides detailed instructions on the surgical techniques, including:

- Preoperative planning
- Patient positioning
- Surgical approaches
- Intraoperative techniques
- Postoperative care

The book is also dilengkapi with over 1,000 full-color photographs and illustrations, as well as online videos that demonstrate the surgical techniques in real time.

## Features

- **Comprehensive coverage** of the most common neurosurgical procedures

- **Step-by-step instructions** with full-color photographs and illustrations
- **Online videos** that demonstrate the surgical techniques in real time
- **Written by a world-renowned neurosurgeon** with decades of experience
- **Ideal for neurosurgeons of all levels**, from residents to experienced surgeons

## Benefits

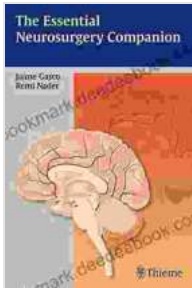

- **Improves surgical outcomes** by providing clear and concise instructions on the latest surgical techniques
- **Saves time and resources** by providing all the information surgeons need in one convenient place
- **Enhances patient safety** by helping surgeons avoid complications
- **Advances the field of neurosurgery** by sharing the latest knowledge and techniques with the next generation of surgeons

Essential Neurosurgery Companion is an invaluable resource for neurosurgeons of all levels. Its comprehensive coverage, step-by-step instructions, full-color photographs, and online videos make it the definitive guide to neurosurgical procedures. This book is a must-have for any neurosurgeon who wants to improve their surgical outcomes, save time and resources, and enhance patient safety.
