The Origins of London's Night Buses

The first night bus in London was introduced in 1913. It was the N1, which ran from Trafalgar Square to Edmonton. The service was initially intended to serve factory workers who needed to get home after their shifts.

However, it soon became popular with other night-time travellers, including theatre-goers and revellers.

In the years that followed, more night bus routes were introduced. By the 1930s, there was a network of night buses serving all parts of London. The buses were an essential part of the city's nightlife, and they played a key role in the evacuation of London during the Second World War.

The Challenges of London's Night Buses

Running a night bus service is not without its challenges. The buses must operate in all weather conditions, and they often have to contend with heavy traffic. In addition, night buses are often targeted by criminals.

Despite these challenges, London's night buses have continued to operate for over 100 years. This is thanks to the dedication of the bus drivers, who work hard to ensure that the service is safe and reliable.
